Message from the Chairman Jalaprathan Cement Public Company Limited

In 2020, the Covid-19 pandemic outbreak affected the residential and commercial sectors adversely, which slowed down construction activities significantly, and resulted in the demand for cement in Thailand decreasing by around 2 percent compared to 2019.

The total revenue of the Company decreased by 7 percent due to market and price pressures to Baht 2,604 million, however net profit improved to Baht 99 million as the Company managed to improve its operating margins by proactively minimizing the Covid-19 impact on profitability through several cost and working capital improvements, investment discipline, launching of new green products and services, energy costs management, as well as improving efficiency and productivities. The Company continues to focus on improving efficiencies, cost management, sustainability and customer centricity.

During Covid-19 pandemic, the Company has proactively implemented safety measures, also in coordination with our stakeholders, to protect people and maintain business continuity in a safe way. Until February 2021, there have been no Covid infections within JCC Group.

The success and sustainability of business shall come together with good corporate governance and responsibility for all stakeholders. In 2020 Takli and Cha-am Plants was granted Green Mining Award and CSR-DPIM Award by the Department of Primary Industries and Mines and Takli Plant was also granted Green Industry Certification Level 3 by the Department of Primary Industries and Mines.

Besides, the Company has continually supported various types of activities such as granting "Golden Naga" scholarship and lunch fund to students in the schools situated nearby the plant, providing a mobile medical unit to give free service for local people, promoting cultural activities including paying a visit to local communities to hear their opinions for a better understanding of the local community's concerns.

On behalf of the Board of Directors and management of Jalaprathan Cement Public Company Limited, I would like to extend my gratitude to our clients, shareholders, stakeholders and employees for your support of the Company.

General Ayupoon Karnasuta

Gom. a. Kout,

Chairman of the Board

7. Mr. Kevin Gerard Gluskie	180,000
Total	2,542,000

Independent Auditor's Report

To the shareholders of Jalaprathan Cement Public Company Limited

My opinion

In my opinion, the consolidated financial statements and the separate financial statements present fairly, in all material respects, the consolidated financial position of the Company financial position of Jalaprathan Cement Public Company Limited (the Company) and its subsidiaries (the Group) and the separate financial position of the Company as at 31 December 2020, and its consolidated and separate financial performance and its consolidated and separate cash flows for the year then ended in accordance with Thai Financial Reporting Standards (TFRS).

What I have audited

The consolidated financial statements and the separate financial statements comprise:

- the consolidated and separate statements of financial position as at 31 December 2020;
- the consolidated and separate statements of comprehensive income for the year then ended;
- the consolidated and separate statements of changes in equity for the year then ended;
- the consolidated and separate statements of cash flows for the year then ended; and
- the notes to the consolidated and separate financial statements, which include significant accounting policies and other explanatory information.

Basis for opinion

I conducted my audit in accordance with Thai Standards on Auditing (TSAs). My responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the consolidated and separate financial statements section of my report. I am independent of the Group and the Company in accordance with the Code of Ethics for Professional Accountants issued by the Federation of Accounting Professions that are relevant to my audit of the consolidated and separate financial statements, and I have fulfilled my other ethical responsibilities in accordance with these requirements. I believe that the audit evidence I have obtained is sufficient and appropriate to provide a basis for my opinion.

Responsibilities of the directors for the consolidated and separate financial statements

The directors are responsible for the preparation and fair presentation of the consolidated and separate financial statements in accordance with TFRS, and for such internal control as the directors determine is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, the directors are responsible for assessing the Group's and the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group and the Company or to cease operations, or has no realistic alternative but to do so.

The audit committee assists the directors in discharging their responsibilities for overseeing the Group's and the Company's financial reporting process.

Auditor's responsibilities for the audit of the consolidated and separate financial statements

My objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes my opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with TSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate financial statements.

As part of an audit in accordance with TSAs, I exercise professional judgement and maintain professional scepticism throughout the audit. I also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements,
 whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
 evidence that is sufficient and appropriate to provide a basis for my opinion. The risk of not detecting a material
 misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion,
 forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are
 appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's
 and the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Company's ability to continue as a going concern. If I conclude that a material uncertainty exists, I am required to draw attention in my auditor's report to the related disclosures in the consolidated and separate financial statements or, if such disclosures are inadequate, to modify my opinion. My conclusions are based on the audit evidence obtained up to the date of my auditor's report. However, future events or conditions may cause the Group and the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities
 within the Group to express an opinion on the consolidated financial statements. I am responsible for the direction,
 supervision and performance of the group audit. I remain solely responsible for my audit opinion.

I communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that I identify during my audit.

1 General information

Jalaprathan Cement Public Company Limited ("the Company") is a public company limited which was established on 17 May 1994, in Thailand. The addresses of its registered offices are as follows:

Head office: 23/124 - 128 Soi Soonvijai, Rama 9 Rd, Bangkapi, Huay Kwang, Bangkok.
Takli Plant: 1, Jalaprathan Cement Rd, Tambon Takli, Amphur Takli, Nakhon Sawan.
Cha-am Plant: 1, Jalaprathan Cement Rd, Tambon Cha-am, Amphur Cha-am, Phetchaburi.

The Company's principal business operation is manufacture and distribute cement the Company has subsidiaries as disclosed in Note 14. For reporting purposes, the Company and its subsidiaries are referred to as the Group.

The Company is under control of Asia Cement Public Company Limited (ACC) (registered in Thailand). As at 31 December 2020 and 2019, 88.84% of the Company's shares are held by ACC and 11.16% held by other companies and individuals.

These consolidation and separate financial statements were authorised for issue by the Board of Directors on 25 February 2021.

2 Basis of preparation

The consolidated and separate financial statements have been prepared in accordance with Thai Generally Accepted Account Principles (GAAP) under the Accounting Act. B.E. 2543, being those Thai Financial Reporting issued under the Accounting Professions Act. B.E. 2547.

The consolidated and separate financial statements have been prepared under the historical cost convention except where otherwise disclosed in the accounting policies below.

The preparation of financial statements in conformity with TFRS requires management to use certain critical accounting estimates and to exercise its judgement in applying the Group's accounting policies. The areas involving a higher degree of judgement or complexity, or areas that are more likely to be materially adjusted due to changes in estimates and assumptions are disclosed in Note 5

An English version of the consolidated and separate financial statements have been prepared from the statutory financial statements that are in the Thai language. In the event of a conflict or a difference in interpretation between the two languages, the Thai language statutory financial statements shall prevail.

3 New and amended financial reporting standards

- 3.1 New and amended financial reporting standards that are effective for accounting period beginning on or after 1 January 2020 and have impacts to the Group
 - a) Financial instruments

The new financial standards related to financial instruments are as follows:

TAS 32	Financial instruments: Presentation
TFRS 7	Financial instruments: Disclosures

TFRS 9 Financial instruments

TFRIC 16 Hedges of a net investment in a foreign operation
TFRIC 19 Extinguishing financial liabilities with equity instruments

The new financial reporting standards related to financial instruments introduce new classification and measurement requirements for financial instruments as well as provide derecognition guidance on financial assets and financial liabilities. The new guidance also provides an option for the Group to apply hedge accounting to reduce accounting mismatch between hedged item and hedging instrument. In addition, the new rule provides detailed guidance on financial instruments issued by the Group whether it is a liability or an equity. Among other things, they require extensive disclosure on financial instruments and related risks.

The new classification requirements of financial assets require the Group to assess both a) business model for holding the financial assets; and b) cash flow characteristics of the asset whether the contractual cash flows represent solely payments of principal and interest (SPPI). The classification affects the financial assets' measurement. The new guidance requires assessment of impairment of financial assets as well as contract assets and recognition of expected credit loss from initial recognition.

On 1 January 2020, the Group has adopted the financial reporting standards related to financial instruments in its financial statements. There is no impact on classification from the first-time adoption and the impact on the Group's and the Company's retained earnings as of 1 January 2020 is immaterial.

b) TFRS 16, Leases

Where the Group is a lessee, TFRS 16, *Leases* will result in almost all leases being recognised on the balance sheet as the distinction between operating and finance leases is removed. A right-of-use asset and a lease liability will be recognised, with exception on short-term and low-value leases.

The Group has early adopted the new lease standard in its financial statements since 1 January 2019.

- c) Amendment to TAS 12, Income tax clarified that the income tax consequences of dividends of financial instruments classified as equity should be recognised according to where the past transactions or events that generated distributable profits were recognised.
- d) Amendment to TAS 19, Employee benefits (plan amendment, curtailment or settlement) clarified accounting for defined benefit plan amendments, curtailments and settlements that the updated assumptions on the date of change are applied to determine current service cost and net interest for the remainder of the reporting period after the plan amendment, curtailment or settlement.
- e) Amendment to TAS 23, Borrowing costs clarified that if a specific borrowing remains outstanding after the related qualifying asset is ready for its intended use or sale, it becomes part of general borrowings.
- f) Amendment to TFRS 3, Business combinations clarified that obtaining control of a business that is a joint operation is a business combination achieved in stages. The previously held interest is therefore re-measured.
- g) TFRIC 23, Uncertainty over income tax treatments explained how to recognise and measure deferred and current income tax assets and liabilities where there is uncertainty over a tax treatment. In particular, it discusses:
 - that the Group should assume a tax authority will examine the uncertain tax treatments and have full knowledge of all related information, i.e. that detection risk should be ignored.
 - that the Group should reflect the effect of the uncertainty in its income tax accounting when it is not probable that the tax authorities will accept the treatment.
 - that the judgements and estimates made must be reassessed whenever circumstances have changed or there is new information that affects the judgements.
- 3.2 New and amended financial reporting standards that are effective for accounting period beginning or after 1 January 2021 and have impacts to the Group

Certain amended financial reporting standards have been issued that are not mandatory for current reporting period and have not been early adopted by the Group.

- a) Revised Conceptual Framework for Financial Reporting added the following key principals and guidance:
 - Measurement basis, including factors in considering difference measurement basis
 - Presentation and disclosure, including classification of income and expenses in other comprehensive
 - Definition of a reporting entity, which maybe a legal entity, or a portion of an entity
 - Derecognition of assets and liabilities

The amendment also includes the revision to the definition of an asset and liability in the financial statements, and clarification to the prominence of stewardship in the objective of financial reporting.

b) Amendment to TFRS 3, Business combinations amended the definition of a business which requires an acquisition to include an input and a substantive process that together significantly contribute to the ability to create outputs. The definition of the term 'outputs' is amended to focus on goods and services provided to customers and to exclude returns in the form of lower costs and other economic benefits.

- c) Amendment to TFRS 9. Financial instruments and TFRS 7. Financial instruments: disclosures amended to provide relief from applying specific hedge accounting requirements to the uncertainty arising from interest rate benchmark reform such as IBOR. The amendment also requires disclosure of hedging relationships directly affected by the uncertainty.
- d) Amendment to TAS 1, Presentation of financial statements and TAS 8, Accounting policies, changes in accounting estimates and errors amended to definition of materiality. The amendment allows for a consistent definition of materiality throughout the Thai Financial Reporting Standards and the Conceptual Framework for Financial Reporting. It also clarified when information is material and incorporates some of the guidance in TAS 1 about immaterial information.

Accounting policies

Foreign currency translation

a) Functional and presentation currency

The financial statements are presented in Thai Baht, which is the Company and Group's functional currency and presentation currency.

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are re-measured.

Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the profit or loss.

When a gain or loss on a non-monetary item is recognised in other comprehensive income, any exchange component of that gain or loss is recognised in other comprehensive income. Conversely, when a gain or loss on a non-monetary item is recognised in the profit and loss, any exchange component of that gain or loss is recognised in profit and loss.

4.2 Cash and cash equivalents

In the consolidated and separate statements of cash flows, cash and cash equivalents include cash on hand, deposits held at call with banks, other short-term highly liquid investments with maturities of three months or less from date of acquisition and are not used as collateral.

4.3 Trade accounts receivable

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. They are generally due for settlement within 30 to 60 days and therefore are all classified as current.

Trade receivables are recognised initially at the amount of consideration that is unconditional unless they contain significant financing components, they are recognised at fair value. The Group holds the trade receivables with the objective to collect the contractual cash flows and therefore measures them subsequently at amortised cost.

The impairment of trade receivables are disclosed in Note 4.6 d).

4.4 Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined by the weighted average method. The cost of purchase comprises both the purchase price and costs directly attributable to the acquisition of the inventory. such as import duties and transportation charges, less all attributable discounts, allowances or rebates. The cost of finished goods and work in progress comprises raw materials, direct labour, other direct costs and related production overheads based on normal operating capacity. It excludes borrowing costs.Net realisable value is the estimate of the selling price in the ordinary course of business, less the costs of completion and selling expenses. Allowance is made, where necessary, for obsolete, slow-moving and defective inventories and recognised as a cost of sale in the period which they arise.

4.5 Investments in subsidiaries

a) Subsidiaries

Subsidiaries are all entities (including structured entities) over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns though its power over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

The subsidiaries of The Group are disclosed in Note 14.

The Group applies the acquisition method to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair value of the assets transferred, the liabilities incurred to the former owners of acquiree and the equity interests issued by the Group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Acquisition-related costs are expensed as incurred. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. On an acquisition-by-acquisition basis, the Group recognises any non-controlling interest in the acquiree either at fair value or at the non-controlling interest's proportionate share of the acquiree's net assets.

If the business combination is achieved in stages, the acquisition date carrying value of the acquirer's previously held equity interest in the acquiree is re-measured to fair value at the acquisition date; any gains or losses arising from such re-measured are recognised in profit or loss.

Any contingent consideration to be transferred by the Group is recognised at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration that is deemed to be an asset or liability is recognised either in profit or loss or as a change to other comprehensive income. Contingent consideration that is classified as equity is not re-measured, and its subsequent settlement is accounted for within equity.

The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the identifiable net assets acquired is recorded as goodwill. If the total of consideration transferred, non-controlling interest recognised and previously held interest measured is less than the fair value of the net assets of the subsidiary acquired in the case of a bargain purchase, the difference is recognised directly in profit or loss.

Intercompany transactions, balances and unrealised gains or losses on transactions between group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the transferred asset. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

b) Transactions with non-controlling interest

The Group treats transactions with non-controlling interests as transactions with equity owners of the Group. For purchases from non-controlling interests, the difference between any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity.

c) Disposal of subsidiaries

When the Group ceases to have control, it shall cease to consolidate its subsidiaries. Any retained interest in the entity is re-measured to its fair value, with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities.

d) Business combination under common control

The Group accounts for a business combination under common control by measuring acquired assets and liabilities of the acquire in the proportion of interests under common control at the carrying values of the acquiree presented at the highest level of the consolidation prior to the business combination under common control at the acquisition date. The Group retrospectively adjust the business combination under common control transactions as if the combination occurred from the beginning of the period of which the financial statements in the previous period are comparatively presented in accordance with the guidance of business combination under common control as issued by the Federation of Accounting Professions.

Costs of business combination under common control are the aggregated amount of fair value of assets transferred, liabilities incurred and equity instruments issued by the acquirer at the date of which the exchange in control occurs. Other costs directly attribute to business combination under common control, such as professional fees of legal advisors and other advisors, registration fees, and costs relating to preparation of information for shareholders, are capitalised as an investment in the separate financial statements while immediately recognised as expenses in the consolidated financial statements in the period of which the business combination occurs.

The difference between costs of business combination under common control and the acquirer's interests in the carrying value of the acquiree is presented as "Surplus arising from business combination under common control" in equity and is derecognised when the investment is disposed (transfer to retained earnings).

e) Separate financial statement

In the is separated financial statements, investments in subsidiaries and associates are accounted for at cost less impairment. Cost is adjusted to reflect changes in consideration arising from contingent consideration amendments. Cost also includes direct attributable costs of investment.

4.6 Financial asset

For the year ended 31 December 2020

a) Classification

From 1 January 2020, the Group classifies its debt instrument financial assets in the following measurement categories depending on a) business model for managing the asset and b) the cash flow characteristics of the asset whether they represent solely payments of principal and interest (SPPI).

- those to be measured subsequently at fair value (either through other comprehensive income or through profit or loss); and
- those to be measured at amortised cost.

The Group reclassifies debt investments when and only when its business model for managing those assets changes.

For investments in equity instruments, the Group has an irrevocable election at the time of initial recognition to account for the equity investment at fair value through profit or loss (FVPL) or at fair value through other comprehensive income (FVOCI) except those that are held for trading, they are measured at FVPL.

Recognition and derecognition b)

Regular way purchases, acquires and sales of financial assets are recognised on trade-date, the date on which the Group commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all the risks and rewards of ownership.

C) Measurement

At initial recognition, the Group measures a financial asset at its fair value plus, in the case of a financial asset not at FVPL, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVPL are expensed in profit or loss.

Financial assets with embedded derivatives are considered in their entirety when determining whether the cash flows are solely payment of principal and interest.

Impairment d)

From 1 January 2020, the Group applies the TFRS 9 simplified approach in measuring the impairment of trade receivables which applies lifetime expected credit loss, from initial recognition, for all trade receivables.

To measure the expected credit losses, trade receivables have been grouped based on shared credit risk characteristics and the days past due. The expected credit loss rates are based on payment profiles, historical credit losses as well as forward-looking information and factors that may affect the ability of the customers to settle the outstanding balances.

For other financial assets carried at amortised cost and FVOCI, the Group applies TFRS 9 general approach in measuring the impairment of those financial assets. Under the general approach, the 12-month or the lifetime expected credit loss is applied depending on whether there has been a significant increase in credit risk since the initial recognition.

The significant increase in credit risk (from initial recognition) assessment is performed every end of reporting period by comparing a) expected risk of default as of the reporting date and b) estimated risk of default on the date of initial recognition.

The Group assesses expected credit loss by taking into consideration forward-looking information and past experiences. The expected credit loss is a probability-weighted estimate of credit losses (probabilityweighted present value of estimated cash shortfall). The cash shortfall is the difference between all contractual cash flows that are due to the Group and all cash flows expected to receive, discounted at the original effective interest rate.

When measuring expected credit losses, the Group reflects the following:

- probability-weighted estimated uncollectible amounts
- time value of money; and
- supportable and reasonable information as of the reporting date about past experience, current conditions and forecasts of future situations.

Impairment (and reversal of impairment) losses are recognised in profit or loss as a separate line item.

4.7 Property, plant and equipment

Land is stated at fair value less allowance for impairment (if any). The fair value is appraised by an independent professional appraiser by using the market approach. The Group periodically reviews the appraisal value to ensure that the book value at the end of the reporting period is not significantly different from the fair value.

Plant and equipment are stated at historical cost less accumulated depreciation and allowance for impairment (if any). Initial cost includes other direct cost related to the assets acquisition.

Mine and guarries are stated at cost less accumulated depletion and allowance for impairment (if any).

Mine and quarries cost which use as source of raw material for production cement and concrete, respectively consist of:

Mine and quarries cost which are owned by the Company, the cost includes the land improvement and development costs.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to profit or loss during the financial period in which they are incurred.

The increase in the carrying amount arising from revaluation of land is credited to the other comprehensive income and presented as surplus on revaluation of land in equity. The decrease that offsets the previous increase of the same asset is charged in the other comprehensive income and debited against the surplus on revaluation of land in equity, other decreases are charged to profit or loss.

Land is not depreciated. Depreciation on other assets is calculated using the straight-line method to write off the cost of each asset to their residual values over the estimated useful lives as follows:

Buildings and leasehold improvement Machinery, tools and equipment Fixtures and office equipments Vehicles

5 - 30 years

5 - 30 years

3 - 10 years

5 - 12 years

The depletion rate of mine and quarries cost is determined by the ratio between the actual units of resources extracted for the year and total number of units extractable from the mine and quarries.

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

Where the carrying amount of an asset is greater than its estimated recoverable amount, it is written down immediately to its recoverable amount.

Gains or losses on disposals of property, plant and equipment are determined by comparing the net proceeds from disposal of assets with the carrying amount of assets and are recognised as other gains (losses) (net) in profit or loss. When revalued assets are sold, the amounts of surplus on revaluation are transferred to retained earnings.

Intangible assets

Computer software

Costs associated with maintaining computer software programmes are recognised as an expense as incurred. Development costs that are directly attributable to the design and testing of identifiable and unique software products controlled by the Group is recognised as intangible assets when the following criteria are met:

- It is technically feasible to complete the software product so that it will be available for use:
- Management intends to complete the software product and use or sell it:
- There is an ability to use or sell the software product:
- It can be demonstrated how the software product will generate probable future economic benefits;
- Adequate technical, financial and other resources to complete the development and to use or sell the software product are available; and
- The expenditure attributable to the software product during its development can be reliably measured.

Directly attributable costs that are capitalised as part of the software product include the software development employee costs and an appropriate portion of relevant overheads.

Other development expenditures that do not meet these criteria are recognised as an expense as incurred. Development costs previously recognised as an expense are not recognised as an intangible asset in a subsequent period.

Computer software development costs recognised as intangible assets are amortised using the straight-line method over their estimated useful lives, which does not exceed 10 years.

Mining concession costs

Mining concessions are recognised at cost, which consist of applicable fees for acquiring the concessions and expenses paid for sanctuary permission, less accumulated depletion. The Group depletes mining concessions by using the ratio of the actual units of mineral extracted for the year and total number of extractable mineral units.

4.9 Impairment of assets

Assets that have an indefinite useful life, (for example goodwill), are not subject to amortisation and are tested annually for impairment. Assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the carrying amount of the assets exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest level for which there are separately identifiable cash flows. Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

The Group recognises an impairment loss in profit or loss. Except for land that has been revalued and recognised as the surplus on revaluation in the equity, such impairment loss is recognised in equity only the amount not excess the previous surplus on revaluation.

4.10 Leases

Leases - where the Group is the lessee

Leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Group. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. The right-of-use asset is depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis.

Contracts may contain both lease and non-lease components. The Group allocates the consideration in the contract to the lease and non-lease components based on their relative stand-alone prices. However, for leases of real estate for which the group is a lessee, it has elected not to separate lease and non-lease components and instead accounts for these as a single lease component.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable
- payments of penalties for terminating the lease, if the lease term reflects the lessee exercising that option.

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be determined, the lessee's incremental borrowing rate is used, being the rate that the lessee would have to pay to borrow the funds necessary to obtain an asset of similar value in a similar economic environment with similar terms and conditions.

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability
- any lease payments made at or before the commencement date less any lease incentives received
- any initial direct costs, and
- restoration costs.

Payments associated with short-term leases and leases of low-value assets are recognised on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a lease term of 12 months or less. Low-value assets comprise IT-equipment and small items of office furniture.

4.11 Financial liabilities

For the year ended 31 December 2020

Classification a)

Financial instruments issued by the Group are classified as either financial liabilities or equity securities by considering contractual obligations.

- Where the Group has an unconditional contractual obligation to deliver cash or another financial asset to another entity, it is considered a financial liability unless there is a predetermined or possible settlement for a fixed amount of cash in exchange of a fixed number of the Group's own equity instruments.
- Where the Group has no contractual obligation or has an unconditional right to avoid delivering cash or another financial asset in settlement of the obligation, it is considered an equity instrument.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

b) Measurement

Financial liabilities are initially recognised at fair value and are subsequently measured at amortised cost.

Derecognition and modification c)

Financial liabilities are derecognised when the obligation specified in the contract is discharged, cancelled, or expired.

Where the terms of a financial liability are renegotiated/modified, the Group assesses whether the renegotiation / modification results in the derecognition of that financial liability. Where the modification results in an extinguishment, the new financial liability is recognised based on fair value of its obligation. The remaining carrying amount of financial liability is derecognised. The difference as well as proceed paid is recognised as other gains/(losses) in profit or loss.

Where the modification does not result in the derecognition of the financial liability, the carrying amount of the financial liability is recalculated as the present value of the renegotiated / modified contractual cash flows discounted at its original effective interest rate. The difference is recognised in other gains/(losses) in profit or loss.

For the year ended 31 December 2019

Borrowings

Borrowings are recognised initially at the fair value, net of directly attributable transaction costs incurred. Borrowings are subsequently stated at amortised cost.

Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it will be drawn down. The fee is deferred until the drawn down occurs and included in effective interest calculation. However, if it is probable that facility will not be drawn down, that portion of the fee paid is recognised as a prepayment and amortised over the period of related facility.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date

Current and deferred income taxes

The tax expense for the period comprises current and deferred tax. Tax is recognised in profit or loss, except to the extent that it relates to items recognised in other comprehensive income or directly in equity. In this case the tax is also recognised in other comprehensive income or directly in equity, respectively.

Current tax

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the end of reporting period in the countries where the Group operates and generates taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax

Deferred income tax is recognised, using the liability method, on temporary differences arising from differences between the tax base of assets and liabilities and their carrying amounts in the financial statements. However, the deferred income tax is not accounted for temporary difference arising from:

- initial recognition of an asset or liability in a transaction other than a business combination that affects neither accounting nor taxable profit or loss is not recognised.
- investments in subsidiaries where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred income tax is measured using tax rates that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred tax asset is realised or the deferred tax liability is settled.

Deferred tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

4.13 Employee benefits

The Group operates various post-employment benefits schemes as follows:

4.13.1 Post-employment

Defined contribution plan a)

A defined contribution plan is a plan under which the Group pays fixed contributions into a separate entity. The Group has no legal or constructive obligations to pay further contributions once the contributions have been paid even if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods. The Group pays contributions to a separate fund which is managed by an external fund manager in accordance with the Provident Fund Act. B.E. 2530. The Group pays a contribution to the fund monthly at rates of 5% - 10% of salary. The contributions are recognised as expense in profit or loss when they are due.

Retirement benefits plan

A retirement benefit plan is a retirement plan that is not a defined contribution plan. Typically defined benefit plans define an amount of retirement benefit that an employee will receive on retirement, usually depends on one or more factors such as age, years of service and compensation.

Termination benefits plan of a subsidiary c)

Termination benefits plan of a subsidiary is the benefits provided to employees in the event that the employee resigns before retirement age. The subsidiary is unable to cancel such benefits. The amount of benefits that an employee will receive which usually dependent on factors such as year of service, compensation and discount rate etc.

4.13.2 Other Long-term benefits

Unused annual leave plan

Unused annual leave plan is the benefit plan for employee which they will receive upon resignation. The amount of benefits that an employee will receive is usually dependent on factors such as years of service, number of annual leave days and discount rate etc.

The liability of retirement benefits plan, unused annual leave plan and termination benefits plan of a subsidiary are recognised in the statement of financial position in respect of defined benefit retirement plans is the present value of the defined benefit obligation at the end of the reporting period. The defined benefit obligation is calculated annually by independent actuary using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using market yield of government bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related retirement liability.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised as follows:

- For retirement benefit plan of the Group and termination benefits plan of a subsidiary, charged or credited to equity in other comprehensive income in the period which they arise.
- For unused annual leave plan of the Group, charged to profit or loss in which they arise.

Past-service costs are recognised immediately in profit or loss.

4.13.3 Short-term employee benefits

Salary, wage, bonus and social security fund contribution are recognised as expenses when the transactions occur. The employee benefits are recognised when there are legal or traditional obligations in the past, which causes a constructive obligation.

4.14 Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, which is probable that an outflow of resources will be required to settle the obligation and the amount has been reliably estimated.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation. The increase in the provision due to passage of time is recognised as interest expense.

Share capital

Ordinary shares with discretionary dividends are classified as equity.

Incremental costs directly attributable to the issue of new shares or options (net of tax) are shown in equity as a deduction.

Revenue recognition

Revenues include all revenues from ordinary business activities. All ancillary income in connection with the delivery of goods and rendering of services in the course of the Group's ordinary activities is also presented as revenue.

Revenue is recorded net of value added tax. It is recognised in accordance with the provision of goods or services, provided that collectibility of the consideration is probable.

Multiple element arrangements involving delivery or provision of multiple products or services are separated into distinct performance obligations. Total transaction price of the bundled contract is allocated to each performance obligation based on their relative standalone selling prices or estimated standalone selling prices. Each performance obligation is recognised as revenue on fulfillment of the obligation to the customer.

The Group's revenue recognition from sales of goods and services is as follows:

- Revenue from sales of goods is recognised at point in time, when the control of the goods are transfers to the
- Revenue from provided freight service is recognised over a period of time (over time) when the Group has fulfilled the obligation specified in the contract with customers.

Other income is recognised as follow:

- Rental income is recognised using the straight-line method over the term of the lease on an accrual basis.
- Interest income is recognised using the effective interest method.
- Income from sale of scrap is recognised when sales occur.

4.17 Finance costs

Finance costs comprise bank charge, interest expenses from lease liabilities and interest expense from long-term provisions.

Dividend distribution

Dividend distribution to the Company's shareholders is recognised as a liability in the financial statements in the period which the dividends are approved by the Company's shareholders, and an interim dividend is approved by the Board of Directors.

4.19 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as Board of Directors that makes strategic decisions.

Critical accounting estimates and judgements

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Critical accounting estimates and assumptions

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates may differ from the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are outlined below.

Expected credit loss of trade receivable

The Group applies the TFRS 9 simplified approach to measure expected credit losses which uses a lifetime expected loss allowance for all trade receivables and contract assets.

To measure the expected credit losses, trade receivables have been grouped based on shared credit risk characteristics. The expected loss rates are based on the payment profiles of sales over the past 3 years and the corresponding historical credit losses experienced within this period.

Property, plant and equipment and depreciation b)

In determining depreciation of building and depreciation and equipment, the management is required to make estimates of the useful lives and salvage values of the building and equipment and to review estimate useful lives and salvage values when there are any changes.

The Group recognises land at revaluation amount based on the valuation by external independent valuer using the sales comparison approach. The valuations depend on assumptions and estimates as described in Note 16.

In addition, the management is required to review property, plant and equipment for impairment on a periodical basis and record impairment losses in the period when it is determined that the recoverable amount is lower than the carrying amount. This requires judgments regarding forecast of future revenue and expenses relating to the assets subject to review.

Deferred tax

Deferred tax assets come from the estimation of some temporary difference effects which is probable to utilise tax benefit. Management's estimation comes from an assumption based on an available future income and any factors or external exposures which might affect the projected future performance. The Group also considered the utilization of the past tax losses and assessed the estimation on a conservative basis.

d) **Employee benefit obligations**

The present value of the employee benefits obligations depends on a number of factors that are determined on an actuarial basis using a number of assumptions, including the assumption relates to discount rate. Any changes in these assumptions will have an impact on the carrying amount of employee benefits obligations.

The Group determines the appropriate discount rate at the end of each year. This is the interest rate that should be used to determine the present value of estimated future cash outflows expected to be required to settle the retirement benefits obligations. In determining the appropriate discount rate, the Group considers the yield of government bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating the terms of the related employee benefits liability.

Additional information of other key assumptions for employee benefits obligations are disclosed in Note 20.

Provision for decommissioning costs e)

The Group has an obligation to decommission the concrete batching plants and restore the leased lands before returning the areas to the lessors at the end of the lease agreements. The Group recognises a provision for decommissioning cost when it is probable that an obligation will arise as a result of past events and the amount to be paid can be reliably estimated. Measurement of provision for decommissioning costs requires the management to exercise judgement in estimating future decommissioning costs, discount rates and the economic useful lives of the assets.

The Group's financial assets and liabilities that are measured or disclosed at fair value within the fair value hierarchy which can be categorised as follows:

- Level 1: The fair value of financial instruments is based on the closing prices (unadjusted) in active markets for identical assets or liabilities.
- The fair value of financial instruments is determined using significant observable inputs and, as little as possible, Level 2: entity - specific estimates.
- Level 3: The fair value of financial instrumetrs is not based on observable market date.

The measurement of fair value of land is disclosed in Note 16.

The disclosure of fair value of long-term loans to others is disclosed in Note 15.

Capital risk management

The primary objective of the Group's capital management is to ensure that it has an appropriate capital structure in order to support its business and maximise shareholder value. As at 31 December 2020, the Group's debt-to-equity ratio was 0.33:1 (2019: 0.43:1) and the Company's was 0.25:1 (2019: 0.31:1).

Segment information

Operating segment information is reported in a manner consistent with the internal reports that are regularly reviewed by the chief operating decision maker in order to make decisions about the allocation of resources to the segment and assess its performance.

For management purposes, the Group is organised into business units based on its products and services and has two reportable segments as follows: a) Manufacturing and distribution of cement and b) Manufacturing and distribution of ready-mixed concrete. These are no operating segments that have been aggregated to form the above reportable operating segments.

The chief operating decision maker monitors the operating results of the business units separately for the purpose of making decisions about resource allocation and assessing performance. Segment performance is measured based on operating profit or loss and on a basis consistent with that used to measure operating profit or loss in the financial statements.

The basis of accounting for any transactions between reportable segments is consistent with that for third party transactions.

The Group is operated in Thailand only. As a result, all of the revenues as reflected in these financial statements pertain to the aforementioned geographical reportable.

In 2020, the Group has revenue from a main customer amount 512,462,694 Baht or 19.68% of the Group's revenue (2019 : the Group has revenue from a main customer amount 308,669,675 Baht or 11.04% of the Group's revenue) which came from ready-mixed concrete segments.

Jalaprathan Cement Public Company Limited Notes to the Consolidated and Separate Financial Statements For the year ended 31 December 2020

Due to the short-term nature of Cash and cash equivalent and trade and other receivables, their carrying amount is considered to be the same as their fair value. For the non-current assets, the fair values are also not significantly different to their carrying amounts.

Information about the impairment of financial assets at amortised cost and the Group's exposure to credit risk is disclosed in Note 4.6 d).

Restricted deposits at financial institutions

Consolidated Separate financial statements financial statements 2020 2020 2019 2019 **Baht** Baht Baht Baht Deposits at banks - current accounts 1,158,100 1,072,600 1,158,100 1,072,600 1,878,857 - savings accounts 1,964,777 1,964,777 1,878,857 3,122,877 2,951,457 3,122,877 2,951,457

As at 31 December 2020 and 2019, restricted deposits at financial institutions of the Group and the Company have interest at a rate of 0.125% per annum (2019: 0.38% per annum).

As at 31 December 2020 and 2019, the Group's restricted deposits at financial institution pledged as security is for quarry-area restoration funds. The funds will be used for the restoration annual plan or in a specific period as stated in an appendix of mining concession certificates.

Investments in subsidiaries (net)

As at 31 December 2020 and 2019, investment in subsidiaries consists of investments in the Company's ordinary shares as follows:

Long-term loans to others

As at 31 December 2019, long term loans to others represent unsecured loans of a subsidiary in Baht currency which have the period of 6 to 7 years. Principal and interest are payable on a monthly basis, bearing interest at a rate of 2.00% per annum. The subsidiary has received repayment of the long term loans in full amount in 2020.

The fair value of long-term loans to others is close to the carrying amount (Level 3 of fair hierarchy).

For the year ended 31 December 2020, depreciation expense is presented in cost of manufacturing in amounting to Baht 86.40 million (2019: Baht 121.68 million), the remaining is included in administrative expenses.

As at 31 December 2020, the allowance for impairment of plant, machinery and equipment related to the manufacturing of clinker at Takli plant is Baht 919.37 million (2019: Baht 919.48 million).

In 2017, fair value of the Group's land was assessed by an independent appraiser by using market approach. The revaluation surplus net of applicable deferred income taxes was credited to other comprehensive income and is shown as "Surplus on revaluation of land" in the equity. The fair value is measured at level 3 of the fair value hierarchy.

Key assumptions used in the revaluation are summarised below.

	The Company's land	Impact to fair value when assumptions are increased
Price per square Wah (Baht)	35 - 10,500	Increase at fair value

Breakdown of land carried on the revaluation basis is as follows:

	Consolidated financial s	
	2020 Baht	2019 Baht
Original cost Surplus from revaluation	58,937,329 2,197,281,477	58,937,329 2,197,281,477
Revalued amount <u>Less</u> Allowance for impairment	2,256,218,806 (4,669,584)	2,256,218,806 (4,669,584)
Net book value	2,251,549,222	2,251,549,222

As at 31 December 2020, the Group has buildings and equipment that are fully depreciated but still in use. The carrying amount before deducting accumulated depreciation and allowance for impairment of those assets amounted to Baht 3,814 million (2019: Baht 3,763 million) and the Company amounted to Baht 3,672 million (2019: Baht 3,615 million).

Remeasurement				
 (Gain)loss arising from financial 				
assumptions changes	(320,938)	(225,045)	(249,114)	(179,087)
 (Gain)loss arising from experience adjustments 	(174,336)	(68,606)	(156,692)	(34,457)
Benefit payment during the year	(211,844)		(211,844)	
Closing balance as at 31 December	1,300,084	1,841,507	1,012,100	1,483,908

The principal actuarial assumptions used are as follows:

		olidated statements	Sepa financial s	arate statement
	2020	2019	2020	2019
	% per annum	% per annum	% per annum	% per annum
Discount rate	1.50	1.70	1.50	1.70
Salary increase rate	3.50	4.00	3.50	4.00

Sensitivity analysis for significant assumption is as follows:

		Increase (decrease) on employee benefit obligations				
		Consol	idated	Sepa	rate	
		financial s	tatements	financial statements		
	Change in	2020	2019	2020	2019	
	assumptions	Baht	Baht	Baht	Baht	
Discount rate	Increase by 0.25%	(1,373,852)	(1,592,544)	(817,129)	(939,750)	
Discount rate	Decrease by 0.25%	1,415,569	1,643,459	845,304	972,866	
Salary increase rate	Increase by 0.25%	1,571,233	1,794,439	929,362	1,057,856	
Salary increase rate	Decrease by 0.25%	(1,531,112)	(1,745,750)	(902,265)	(1,026,186)	

The above sensitivity analysis is based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method has been applied as when calculating the retirement benefits recognised within the statement of financial position.

The weighted average duration of the employee benefit obligations of the Group and the Company for the year ended 31 December 2020 is 7.38 years (2019: the Group and the Company is 8.40 years)

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to the previous period.

On 5 April 2019, an amendment bill to the Labour Protection Law was published in the Government Gazette. The amended law became effective 30 days after its publication. The main amendment is that the compensation for employees who have retired and have more than or equal to 20 years of service has changed from 300 day's pay to 400 day's pay, based on the final wage rate. The Group recognised impact of the amendment to the profit or loss for the year ended 31 December 2019.

Legal reserve

Under the Public Companies Act, the Company is required to set aside as a legal reserve at least 5% of its net profit after deducting accumulated deficit brought forward (if any) until the reserve is not less than 10% of the registered capital. The legal reserve is not distributable as a dividend.

The outstanding balance of other reserve is a general reserve of the Company for future special expenditures and represents the allocation of 5 percent of annual net profit and was accumulated until 1994, when the allocation was discontinued.

Risk management

Significant financial instrument of the Group comprises of cash and cash equivalents, trade and other accounts receivable, loans to other companies, related companies, trade and other accounts payable and lease liabilities. The Group has risks related to those financial instruments and has risk management policy as follows:

Credit risk

The Group has significant concentrations of credit risk related to trade receivables, long-term loans to other companies, related parties, and other receivables. The management has policies in place to ensure that credit is appropriately controlled. Thus, the Group does not expect the significant impact from credit risk. In addition, the Group provides credit dispersedly due to various customers base. The maximum impact amount is book value of loan receivable, and other receivables presented in the statement of financial position.

Interest rate risk

The Group has interest rate risk from cash deposit at financial institutes, loan and borrowing. Most of the Group's financial assets and liabilities bear no interest or floating interest rates of fixed interest rates which are closed to the market rate.

As at 31 December 2020 and 2019, financial assets and financial liabilities are classified by interest rate types and financial assets and financial liabilities which bear fixed interest rate can be classified by contract due date or the date on which the new rate is determined (whichever is earlier) as follows:

Jalaprathan Cement Public Company Limited

Exchange rate risk

The Group didn't have significant exchange rate risk because they didn't have any significant financial assets and liabilities in foreign currencies. The Group considered it unnecessary to use financial derivatives for the purchase of goods to hedge this risk. This was because the management believed that future exchange rate fluctuations wouldn't have a significant impact on the Group's operations.

As at 31 December 2020 and 2019, the Group and the Company had outstanding balances of financial assets and liabilities in foreign currencies as follows:

	Financial a		Financial liabilities as at 31 December		Average excl as at 31 De	•
Currency	2020 Baht	2019 Baht	2020 Baht	2019 Baht	2020 (Baht per foreig	2019 gn currency)
